SOHO
SOLUTIONS

Strengthen your business.

Drive profits by connecting people, processes and information.

We are your strategic partner.

It's crucial at the outset to thoroughly plan what you need to grow your business and improve how you work. We sit down with you and –in plain English– discuss your business situation and your vision for the future. Then, applying our knowledge and analytical skills, we help you make the best decisions on what technology to use to meet your goals and budget.

IT SYSTEM DESIGN
A SOHO business analyst can help you map out workflows and decide on an optimal IT strategy.

INFRASTRUCTURE MANAGEMENT
Experts in upgrading systems and installing servers, networks, cloud computing systems, and more.

WEB DEVELOPMENT
Engage your target audiences, inform them of what you offer, and drive conversions.

We have specialized in IT consulting since 1997, helping companies free up precious time and ignite their growth by:

- Working as a strategic partner to understand the unique business needs of each company and then designing tech solutions that fit like a glove
- Solving computer problems so they stay solved
- Communicating at every step of implementation

New York City businesses choose us as a provider of IT managed services because of our track record of success in:

- Improving efficiency and productivity
- Strengthening connections between your employees, vendors and customers
- Identifying and eliminating IT system bottlenecks
- Driving down expenses

SOHO Solutions Services

IT System Design

Let a SOHO Solutions business systems analyst sit down with you, map out your workflows, and make recommendations on an optimal IT strategy. We offer a full range of IT solutions including premier business applications such as Microsoft SharePoint, Office 365, and Azure. Get a free Business and Technology Assessment.

Infrastructure Management

Our certified staff will repair and maintain your IT infrastructure to make sure it's up and running 24/7. We offer reasonably-priced monthly flat-fee plans. We are expert in upgrading existing systems and installing servers, networks, cloud computing systems, and other components to maximize your company's productivity. Our Infrastructure services include:

- Proactive Monitoring and Support
- Help Desk Services
- Server Installations and Migrations
- Disaster Recovery Planning
- Security Assessments
- Cabling Installation and Management
- IT Relocation Services

Web Development

Drive more business to your company with a strategically designed website. Our web design pros will design a wow! site that will engage your target audiences, efficiently inform them of what you offer, and drive conversions. We apply the latest SEO techniques to keep your site highly visible in internet searches.

Business Solutions

Should you decide to expand or upgrade your existing IT systems, SOHO Solutions offers a wide range of IT products to meet your needs. In addition to hardware, we offer premium software applications to grow your business. Share files, software and printers among your desktops more efficiently with the premier network application, Microsoft Small Business Server; search, share and collaborate more effectively with Microsoft SharePoint; and unlock the limitless possibilities of cloud services with Microsoft Azure.

> " We have been with SOHO since the inception of our company back in July 2000. I like everyone personally and they always respond quickly if an issue arises. Special projects are always well planned and organized. During our migration project SOHO had a Plan A and a Plan B which made us feel confident we wouldn't have any downtime." Their knowledge and genuine concern of our need for a 100% uptime in our business systems are a top priority to them. We wouldn't have it any other way."
